Index

(*Page numbers in italics indicate material in figures or tables.*)

Adams, M., 71
Adams, M. J., 265
Adult learners: deficits underlying reading and spelling difficulties, 191; initial assessment of, 188–91; multisensory strategies for, 187, 191–94, 187–99. *See also* Learning therapy (college course); Read/San Diego (adult literacy program)
American University, 205
Assets (school) in Honolulu, 177, 179–80
Attention-deficit disorder (ADD), gender bias in diagnosis of, 153. *See also* Hyperkinetic children

Barganz, R. A., 33
Berry, C., 153, 157
Bowers, M., 70
Bowers, P. G., 70, 71, 85
Bruck, M., 71
Byrne, M., 153

California Literacy Campaign, 186
Career development, learning disability and, 206
Carlisle, J. F., 33–34, 35
Chall, J. S., 187, 267, 269–70, 271–73, 275
Classroom disruptive behavior, gender and, 154–56
Code emphasis, 258, 260, 262
Consonants, differential representation of vowels and, 6–7
Copying test, 189
Creative thinking: of gifted children, 165; Torrance tests of, 168
Criterion referencing, 173
Crouse, A. B., 32–33
Curriculum for gifted and dyslexic children, 176

Decoding: at the grapheme/phoneme level, 113; written words, 118–19
Decoding programs, 159
Decoding strategies: origin of weak, 133; sequence for acquiring, 120–23
Derived words, 58. *See also* Vocabulary
Dialect differences, reading skills and, 17–19
Double deficit hypothesis, 70, 84–86
Dysgraphia, copying test for, 189
Dyslexia, 167; core deficit in, 255; degraded linguistic representation in, 6; screening for (in Texas), 177
Dyslexics: characteristics of bright young, 164; factors underlying reading difficulites of, 72; morpheme analysis and, 34. *See also* Gifted children

Elbro, C., 34
English writing system, two difficulties in learning the, 117–18

Failure, effects of, 204
Flynn, J., 152
Fowler, A. E., 33

Gifted children: characterizing dyslexic, 166–67; creative thinking of, 165; curriculum for dyslexic, 176; meeting the needs of dyslexic, 177–80; tests accommodations for dyslexic, 178–79
Giftedness, 166
Gow, D., 158
Grammar games, 153

Henry, M. K., 33
Hyperkinetic children, 245. *See also* Attention deficit disoder (ADD)
Hyperlexic children, 71–72

Inhelder, B., 207
Intelligence, vocabulary and, 30

Kuhl, P., 6, 7

Language deficits, detection of subtle, 7–8

Language development, sensorimotor education and, 249
Language learning disabilities: knowledge of suffix meaning and, 59; learning experiences for children with, 254. *See also* Dyslexia
Language and Learning Seminar (York University), 204–207, 207–229, 229–32
Learned helplessness, 204, 207
Learning disability (LD), 151–52, 166; biological factors in, 158; career development and, 206; college course to remedy, 204–207, 207–229, 229–32; emotional maladjustment and, 204; self-esteem and, 203–204
Learning disabled college students: compensatory accommodation and technical aids for, 207; referrals to programs for, 153; therapeutic course for, 204–207, 207–229, 229–32
Learning therapy (college course), 204, 208; altruism and, 215–16; catharsis and, 226–28; corrective recapitulation of the primary group and, 216–17; didactic
Learning therapy (college course) instruction and, 213–14; evaluation of, 229; existential factors and, 228; imitative behavior and, 219–20; installation of hope and, 208–210; interpersonal learning and, 220–23; socializing techniques and, 217–19; universality and, 208–213
Leinhart, G., 155–56, 157
Leong, C. K., 34
Letter naming tasks, 92
Letter-sound blending, 192–94
Lewis, D. J., 59–60, 61, 66
Liberman, I. Y., 33
Linguistic awareness, 22
Literacy tutors: strategy and techniques to be taught to, 191–200; training for, 185–86, 187–88, 191

Meaning emphasis, 258, 260, 262
Mellard, D., 153
Metalinguistic skills, 22
Miller, J. L., 203
Montessori, M., 241
Montessori's methods, 239, 242; learning exercises and, 249–54; the prepared environment and exercises, 243–45; sensory education and, 245–49
Morpheme analysis, dyslexics and, 34
Morphological awareness, 33
Morphological generalization, 30
Morphological knowledge: reading/spelling ability and, 32–36; spelling and, 34–35
Multisensory learning, 191
Multisensory strategies in literacy tutoring, 187, 191–94, 197–99

Naming speed, 6, 75, 83; poor readers and deficits in, 70
Nass, R.,157–58
National Assessment of Educational Progress, 267–68
Nonwords: reading of, 8, 82; spelling of, 189

Orthographic processing, 71; defined, 89–90; development of, 90; development of child and, 92; measures of, 95–96; print exposure and, 106; of reading-disabled students, 102–105; remediating poor, 106; role of (in reading), 90–91. *See also* Spelling
Orthographic skill, 75, 83. *See also* Spelling *entries*

Pencil tracking, 197–98
Pennington, B., 158
Phoneme awareness, 22; exercises for, 251; letter-sound blending to aid, 192–94; reading acquisition and, 70, 135; value of teaching of, 136
Phonetic decoding, value of teaching of, 136
Phonics: resistance to teaching, 273–74; return to teaching of, 260; in teacher training programs, 261

Phonological abilities to predict reading acquisition, 70
Phonological awareness: deficits in, 191; poor reading and deficit in, 70
Phonological measures, 73, 75
Phonological/phonemic deficits, 191
Phonological processing: decoding and, 33; deficits in, 4, 89, 191; measuring, 82; Montessori and, 250–54; remediation in, 34
Piaget, J., 207, 243
Poor readers, characteristics of, 76, 77, 78–79. *See also* Dyslexics; Language deficits; Language learning disabilities
Prefixes, 31
Prior, M., 156

Rahbar, M., 152
Raissle, J., 179–80
Rapid letter naming, 92, 96
Rawson, M., 164
Reading: accuracy of speech perception and, 4; deficits related to impaired, 79–82; ethnicity and, 17–19; cognitive skills and decoding strategies and, 132; Montessori's concept of, 252; strong views on teaching of, 261–62
Reading acquisition: gender and, 158; predictors of, 70, 115, 135, 255
Reading comprehension, vocabulary and, 30
Reading development, stage models of, 119
Reading disabilities: deficits underlying adults', 191; multiple deficits and, 86; preventing, 262–63; spelling-to-speech correspondences and, 266; spoken language impairments and, 59. *See also* Dyslexia
Reading instruction, 258–59; commercial packages for, 267; most effective, 267; political views and, 262, 274; practical decision about, 268; strategies for decoding written words and, 118–19, 133
R eading/spelling ability, morphological knowledge and, 32–36
Reading strategy, testing for a child's, 136
Read/San Diego (adult literacy program), 185–86, 200
Research: reading instruction and, 268–69; on whole language approach, 260
Rogers, C. R., 207, 224, 232
Roots of words, 31
Rubin, H., 35

Sadder, D., 155
Sadker, M., 155
Sanson, A., 156
Schools, teaching reforms and, 271–73
Scottish Rite Hospital for Children, 177
Seewald, A., 155–56, 157
Seguin, e., 242, 246
Semel, E. M., 32–33
Senses, materials for training auditory and visual, 245–49
Sensorimotor education, language development and, 249
Serial naming tasks, reading skills and, 70
Shankweiler, D., 33
Shaywitz, S., 152, 153, 156, 157, 159
Shaywitz, B., 153, 157
Sibley, M., 177–79
Smart, D., 156
Special education programs: causes of preponderance of boys in, 152; gender and referrals to, 159; referral agents for, 153–54
Speech perception: development of speech production and, 5; errors in, 14–16; reading skill and accuracy of, 4
Speech processing, inefficient, 22
Speech production, 16–17; development of speech perception and, 5
Speech segmentation, 4
Spelling: deficits underlying adults' problems with, 191; essential rules for, 189, *190*; gender and skills in, 105; morphological knowledge and, 34–35; phonetic and nonphonetic words and, 198–99. *See also* Orthographic *entries*

Spelling-to-speech correspondence, reading disability and, 266
Spoken language, reading disabilities and impairments of, 59. *See also* Speech *entries*
Stein, M., 267
Student performance, monitoring, 160
Suffixed words, reading disabled students' knowledge of, 35–36, 36–41, 41–48, 49–50
Suffixes, 31–32; language learning disabilities and knowledge of meanings of, 59; meanings of, 59, 66–67; syntactic properties of, 43–49
Syllable boundaries, perception of, 92
Syllables, 106; teaching about, 194–97

Tallal, P., 7
Task demand, 21–23
Teacher training programs, phonics in, 261, 262
Teaching reforms, schools and, 271–73
Temporal processing, 7
Test accommodations for gifted/dyslexic children, 178–79
Textbook publishers, influence of, 270–71
Timing deficits, 7
Torrance, E. P., 165, 170
Torrance, J. P., 170
Tutor training, research on volunteer, 201. *See also* Literacy tutors

Verbal IQ, 71, 75, 84
Vocabulary: growth of children's, 30, 58; intelligence and, 30; reading comprehension and, 30
Vogel, S. A., 32–33, 157
Voice onset time (VOT), 5, 12, 13, 16–18, 21; measurement of vowel length and, 12, 14, 21
Volunteer literacy programs, 187
Volunteer literacy tutors. *See* Literacy tutors
Volunteers, 186–88. *See also* Literacy tutors
Vowel error rate, 8
Vowel identification deficit, 23
Vowel perception, 4–8, 12, 14–19, 20–23, 23–24
Vowels, 4–5; differential representation of consonants and, 6–7; measurement of VOT and length of, 12, 14
Vygotsky, L., 207

Wadsworth, S., 152
Whole language programs, 260
Wiig, E. H., 32–33
Windsor, J., 59–60, 61, 66
Wolf, M., 71, 85, 158
Word recognition, 71, 266
Words, spelling of phonetic and nonphonetic, 198–99
Word superiority effect, 91–92
Written language, Montessori's steps in preparing a child for, 252
Written words, strategies for decoding, 118–19

Yalom, I., 204, 208, 210–11, 213, 215, 216–17, 220–23, 226–27, 228
Yoshimoto, R., 179–80
York University (Toronto), 205
Ysseldyke, J., 156–57

Zigmond, N., 155–56, 157
